

# **READ ME**

## **TELECOME INVENTORY STORE**

The following are the requirements for TIS setup

- Java 1.3
- Eclipse IDE
- Apache tomcat
- Updated browser(chrome preferable)
- MS ACCESS DB
- Needs internet for third party reviews

To set up the project in the IDE import the TIS project as existing project into workspace

- Import the libraries servlet-api.jar from the apache tomcat libraries
- JQuery libraries which are needed are already include in the work space
- Connect the MS access DB using the system DNS and point it to the attached MS access
